

e-TMS

MARITIME by Andsoft

SHIPMENTS MANAGEMENT SOFTWARE

e-TMS is an application for shipping companies. Like all our other applications, e-TMS Maritime has been developed to increase the productivity of our clients in a simple way.

This application for shipping companies has been integrally developed in HTML5 and is based on a full web technology.

e-TMS Maritime is compatible with all the mobile interfaces on the market: iPhones, iPads, Android and tablets.

The design is reactive and you can parameter it from the AnSoft e-TMS application. **e-TMS Maritime** enables the users to access the e-TMS from the boarding dock and to do administrative tasks (changing driver, number plates, delays in loadings) without restrictions.

IT IS SUITABLE FOR THREE TYPES OF SHIPS: CONTAINER SHIPS, ROLL-ON ROLL-OFF FERRIES (RO-RO) AND CARGO SHIPS.

Available on IOS and Android

With the Maritime e-TMS you can control the docking of the ship, routes, predictions, docks, boarding's, customs clearance, and you can manage up the 17 different tariffs.

With this application you can also manage shipment services for freight and containers, and it also has an efficient Track&Trace system for the clients of the shipment company for:

Boarding

Electronic invoices

Placement of the container
